

Energy Letter Assessment

Write a letter to the Welsh assembly explaining your views on:

- The sources of energy used in Wales
- The problems these energy sources cause
- Your solutions to these problems.

WILF SAYS

Level 2	You give simple statements about the use of energy in Wales.
Level 3	You give a simple description of our energy sources in Wales and may describe some possible problems these energy sources cause.
Level 4	You describe current sources of energy within Wales. You describe some of the effects that these sources have on both the human and/or physical environments.
Level 5	You explain how these effects affect the physical and human environments.
Level 6	As well as the description of current energy sources for level 5 you offer alternative energy sources to fossil fuels and therefore to the environmental consequences.
Level 7	The explanations of the environmental/human problems are detailed and good. You offer alternatives to the current energy sources and explain why these are especially suitable for Wales.
Level 8	You would that there are possible drawbacks to the possible alternatives and unexpected consequences. You might also describe possible conflicts that the alternatives might cause.
E.P.	You assess the merits of alternative energy sources (good points and bad points), you justify your choices based on your assessments.
